DISCOVER THE NEW RSC24!

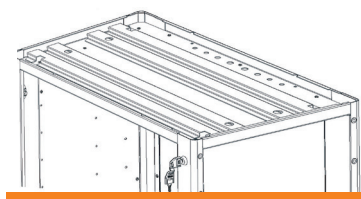

OLD

Beta Utensili has relied on the tried-and-tested frame of the epoch-making, iconic C24S roller cab to develop the best possible product in terms of performance, equipment and durability.

Exterior and interior **epoxy coating** and first-rate details, including the ball bearing slides, ensure remarkable durability.

No doubt **THE NEW WORKTOP** stands out as one of the most innovative parts: **firmer and sturdier**: as the result of the integration of two reinforcement crosspieces joined to the sheet metal surface, which has been increased to 1.5 mm, to support heavy loads;

more convenient and functional: thanks to the addition of eight holes for accommodating screwdrivers;
more modern: based on its new, captivating graphic design.
